

World Clydesdale Show 2022
Location : P&J Live Aberdeen
Date: 20th -23rd October 2022

World Clydesdale Show 2022

Key Health Messages to Exhibitors

Horses will be stabled in a large indoor space with shared air – it is therefore **extremely important** that everything possible is done to restrict the potential for spread of disease at the show.

- 1) Horses will be checked by the veterinary team on the admission and periodically during the show. Any animal showing signs of disease including a raised temperature will **NOT** be allowed into the stabling area.
- 2) Please complete the **Health and Freedom from Disease and Contact Statement** (which is attached below) and submit to the veterinary team on arrival.
- 3) All horses must be vaccinated for **equine influenza** – minimum requirement 2 vaccines 21-90 days apart. All horses must have had a flu vaccination within the last 6 months and a minimum of 6 days clear before entry to the show.
- 4) Check your horse is healthy before leaving home, **do not travel** if you have any concerns.
- 5) Inform the organisers of the show immediately if your horse shows any signs of illness at the show. Digital thermometers will be provided at entry. If your horse is compliant, please monitor temperatures regularly and report any temperatures over **38.5°C** to the vet team.
- 6) Bring everything you will need to minimise contact between your horse(s) and others at the event. Do not share buckets / equipment / tack etc.
